

Solution Architecture

Date	29 September 2026
Team ID	TBD
Project Name	PocketSmart AI
Maximum Marks	3 Marks

Three-layer architecture

Layer	Components	Responsibilities
Presentation	HTML, CSS, JavaScript, Chart.js	Forms, dashboard, charts, theme and API calls
Application	Flask app.py	Authentication, business rules, API routes, analytics, CSV and AI integration
Data / Services	SQLite or PostgreSQL; Gemini API	Persistence and optional external AI capabilities

Request Flow

Browser → Flask API → authentication/business logic → database and optional Gemini API → JSON response → dashboard rendering.

Database entities include Users, Expenses, Budget and Goals. The relational structure is designed so each user can own expenses, budget data and savings goals.
