Customer Problem Statement

Users often record expenses inconsistently, have limited visibility into where their money goes, and may find it difficult to connect daily spending with monthly budgets and savings goals. They need one simple interface that combines tracking, analytics, planning, receipt capture, and actionable recommendations.

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student or young professional	Track spending and save consistently	Expenses are scattered across notes, apps, or memory	There is no simple unified dashboard	Uncertain about whether I am staying within my plan
PS-2	A budget-conscious user	Understand spending patterns	Raw transaction lists do not explain trends	Insights require manual analysis	Unsure where to reduce spending
