

Solution Requirements

Date	29 September 2026
Team ID	TBD
Project Name	PocketSmart AI
Maximum Marks	4 Marks

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	Register/login users and issue authenticated sessions/tokens.	High
2	Authorization	Protect user-specific endpoints and data through authentication checks.	High
3	External interfaces	Optional Google Gemini API for AI recommendations and receipt OCR; Chart.js for visualization.	Medium
4	Transactions	Create, read and manage expense records with amount, category, date and notes.	High
5	Reporting	Dashboard KPIs, category analysis, trends and CSV export.	High
6	Business rules	Budget limits, savings targets, categories and financial-health calculations.	High
7	Compliance	Avoid exposing secrets; provide general financial guidance rather than regulated financial advice.	Medium
8	Other	Dark/light mode, rate limiting and security headers.	Medium

Step 2: Non-Functional Requirements

Category	Requirement
Security	Password hashing, JWT verification, security headers and rate limiting.
Performance	Efficient API requests and asynchronous dashboard data loading.
Usability	Responsive interface with clear dashboards and visual feedback.
Maintainability	Modular Flask backend, static JavaScript/CSS and database abstraction.
Scalability	SQLite fallback with optional PostgreSQL support and external AI integration.
