

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	TBD
Project Name	PocketSmart AI
Maximum Marks	2 Marks

Area	Evidence in PocketSmart AI
Backend organization	app.py groups setup, constants, rate limiting, security, JWT helpers, database helpers and application routes.
Naming	Functions such as get_db(), _verify_jwt(), renderAIRecommendations() and formatMoney() communicate purpose.
Reusability	Authentication decorator, database abstraction and formatting helpers reduce duplicated logic.
Frontend separation	HTML template, static JavaScript and static CSS are separated into dedicated directories.
Configuration	SECRET_KEY and DATABASE_URL are environment-driven; Gemini key is supplied through the client configuration.
Readability	Comments and section headers divide major application concerns.
